

Partners in Building Solutions

Matt Greenwood,
LEED AP
*Operations
Manager*

Responsibilities and Areas of Expertise

As operations manager for Construction Systems Inc. (CSI), Matt is responsible for the daily scheduling of our manpower; he also manages the warehouse, materials, tools and equipment, and coordinates deliveries.

Matt has been with CSI for 10 years. He began as the Assistant to the Vice President and quickly moved up to being an estimator and project manager where he developed expertise with EIFS and pre-engineered metal trusses, as well as, framing drywall and acoustic ceilings. His background in estimating and project management gives him an invaluable perspective for running the daily operations.

Matt continues to estimate and run projects, as well as, maintaining a few select accounts he has developed over the years.
