

Zachary M. Poczik
Project Manager

Responsibilities

As estimator and project manager with the Facilities Group for Construction Systems Inc. (CSI), Zach is responsible for project development, budget pricing, and oversight through project completion. He works primarily in the renovation of medical, institutional and commercial facilities.

Zach has worked with the organization since 2005 while working toward a construction management degree. This involved time in the office, warehouse, trucks and hands on job site experience. Zach moved into the office permanently in January 2011. Zach believes his years of working in the operations provide a true perspective of the every day challenges of getting the job done.

Zach will train with Andy Poczik, his uncle, a forty year employee and the executive vice president. He will also have the opportunity to work with other project managers to gain multiple perspectives on project management and customer service. Zach's classroom work will allow him to keep our team up to speed on the latest technologies introduced to our industry.
