

Rocky Gaal
*Project Manager and
Registered Architect*

Responsibilities and Areas of Expertise

As a registered architect with extensive design, construction management, construction administration, and facility management experience, Rocky brings an exceptionally valuable perspective and skill set to his role as CSI Project Manager and Construction Manager for the CareConnect Deployment in OhioHealth facilities in Columbus, Westerville, Dublin, Grove City, Hilliard, Delaware and Marion.

Rocky joined CSI in 2014 with 39 years of design, team leadership and construction experience on hospital, medical office building, and commercial building renovation, addition and new-build projects. His responsibilities include managing engineering and architectural design services, client relations, project work plan, design services and construction budgets, design team and construction schedules, manpower needs, quality assurance/quality control, document approvals and permits, and project close-out.

CSI's healthcare clients especially appreciate Rocky's thorough understanding of every aspect of hospital and medical facility operations, his ability to adroitly guide hundreds of team members through complex schedules and processes, and his unflappable good humor.

Representative Project Experience

- Project Manager for \$42 million 150,000 sq. ft. four story Surgery Center and Main Entrance addition for Grant Medical Center Revitalization Project. Program included 18 OR's, Pre-Post, Cardiac Care Center, MRI, new main entrance, café, central sterile supply and the implosion of the 16 story former nurse teaching tower and constructing underground electrical service vault.
- Project Manager of multi-discipline design team for Doctors Hospital's 70,000 sq. ft. two story addition. Project included master planning, site analysis, design, production and construction administration for ED and Medical Education Center.
- Project Manager for the Nationwide Mutual Insurance Company Columbus Renovation Program for 1.8 million sq. ft. of office space renovations in four buildings.
- Project Architect responsible for construction administration of Roswell Park Cancer Research Institute, 5th ranked cancer facility in the country. The \$249 million project included a 500,000 sq. ft. new main hospital, 200,000 sq. ft. animal research center, two pedestrian bridges, 120,000 sq. ft. renovation for pathology and associated science labs, and demolition of three buildings.
- Project manager for 14,000 sq. ft. addition built on top of existing three-story Millcreek Community Hospital for new Psychiatric Suite and new single-story 33-bed Skilled Nursing facility addition.
