**Construction Systems Inc. Named as Exclusive
TecCrete™ Installation Contractor**

COLUMBUS, Ohio – March 4, 2008 – Construction Systems Inc. (CSI) has been selected by Haworth, Inc. as the exclusive central Ohio installation contractor for its TecCrete™ Access Flooring product.

TecCrete™ Access Flooring is a raised flooring system that allows for the under-floor distribution of air, as well as voice, data, and power. TecCrete™ utilizes an exclusive concrete-and-steel composite design that offers a far more solid feel underfoot than conventional access floors, making it an ideal solution for environments such as offices, schools, universities, libraries or museums that require an extraordinarily durable and quiet access floor.

Raised flooring and underfloor air distribution systems can be important elements for buildings in the Leadership in Energy and Environmental Design (LEED) Green Building Rating System through the U.S. Green Building Council. These systems allow for improved air quality, lower construction costs, lower building renovation costs, less construction demolition waste, and a compressed construction timeframe.

JD Flaherty, Jr., CSI President states, "TecCrete™ is an outstanding raised flooring product that will help many building owners, facility managers, and general contractors

improve indoor air quality and comfort for occupants and meet LEED building standards. The quality and design features of this product make it suitable for applications throughout the entire building structure. We are proud to be aligned with Haworth and TecCrete™ and look forward to helping our customers with TecCrete™ Access Flooring installations.”

In naming CSI as the exclusive installation contractor in central Ohio, Brian Vogel, Territory Manager for Haworth, Inc., states, “CSI brings the perfect combination of skilled craftsmanship, dedication to quality, and industry relationships that are decades long.” CSI will help introduce the TecCrete™ product to central Ohio design professionals, general contractors, construction managers, facility managers and building owners.

Tim Faherty, Vice President of CSI’s Specialties Division and Matt Vannest, CSI Specialties Project Estimator and Project Manager have completed Haworth installation training and will be responsible for estimating and project management of the TecCrete™ raised flooring system.

About Construction Systems Inc.

Construction Systems Inc. (CSI) is a commercial general trades and specialties subcontractor, and a leading facilities renovation contractor. CSI serves central and southeastern Ohio from its headquarters in Columbus Ohio. CSI self-performs general trades work, and with 110 employees, CSI is one of Central Ohio's largest employers of skilled craftsmen. Celebrating its 40th anniversary in the building industry, CSI has completed over 12,000 projects and worked in hundreds of buildings in central Ohio. For more information about any of CSI's service offerings, projects or company contacts visit www.ConSysOhio.com or call 614-252-0708.
