## **MEDIA RELEASE**

### **Construction Systems Inc. Announces New Division: Atlas Door and Hardware**

*Roger Slapnicker and Carl Dyas Join Atlas Door and Hardware*

COLUMBUS, OHIO – January 18, 2013 – JD Flaherty, Jr., president of Construction Systems Inc. (CSI), a central Ohio commercial construction contractor with 45 years of successful operation, announced today that CSI has formed a new independent entity named Atlas Door and Hardware.

Atlas Door and Hardware provides a broad scope of services and fast turnaround time that is unique in the central Ohio commercial door and hardware industry. Services provided by Atlas include installation, on-site service calls and repairs, and a walk-in sales and service counter offering immediate take-offs and sales of doors, frames and hardware for complete openings and parts for repairs or renovations. Atlas has a large inventory of door and hardware parts, in-house metal and wood fabrication shops to expedite parts fabrication, and is a distributor for several manufacturers and numerous brands.

“The door and hardware industry requires exacting attention to detail, precise scheduling, coordination with many other trades and exemplary dedication to serving customers,” stated Flaherty. “CSI has excelled as a general contractor because of these traits and we look forward to expanding our services with the Atlas Door and Hardware division.”

Flaherty also announced that Roger Slapnicker has joined Atlas Door and Hardware as General Manager and Carl Dyas has joined as Senior Estimator.

As General Manager, Roger Slapnicker is responsible for oversight of sales, purchasing, and management of all operations including installation, service, scheduling and the fabrication shops.

Roger's responsibilities also include vendor relationships and supervision of Atlas' walk-in sales and service counter.

Slapnickner joins Atlas with 18 years of experience in all facets of the door and hardware industry, including installation and service crew leader, estimator, project manager and sales representative.

As Senior Estimator, Carl Dyas is responsible for estimating and procurement of complete door and hardware bid packages, renovations and repairs, provides estimating and procurement support for Atlas' walk-in sales and service counter and also coordinates the fabrication of parts with Atlas' in-house metal and wood fabrication shops.

Dyas has 28 years of commercial construction experience, including 20 years of project scheduling, purchasing, expediting and materials management experience in the door and hardware industry. He brings extensive product knowledge of commercial hollow metal and wood doors and frames as well as finish hardware.

"Roger and Carl bring a wealth of experience and technical knowledge of every facet of the commercial door and hardware business and will be great assets to Atlas' clients," said Flaherty. "We are delighted to have their leadership and expertise on the Atlas Door and Hardware team."

#### **About Atlas Door and Hardware**
